

# FIRE RAGES FOR HOURS AT GERMAN NAVAL BASE.

## SUBMARINE DEPARTMENT IS SERIOUSLY DAMAGED.

Most of Village of Bullecourt now in Hands of the British.

(BY ATLANTIC CABLE AND A. P.)  
AMSTERDAM, May 13 (via London).—For seven hours on Wednesday a great fire raged in the Imperial wharves at Wilhelmshaven, according to advices received here today. The submarine building department was seriously damaged. The entrance has been closed to the public.

Wilhelmshaven is the chief German naval station and war base in the North Sea and is the second largest naval base of Germany.

May 12.—Most of the village of Bullecourt, in the Hindenburg line, is now in the hands of the British, who also, according to an official report from headquarters in France, occupied the village of Rieux.

The morning the enemy further counter-attacks in the Hindenburg line. In the case of Bullecourt, the attacking troops were repulsed and left a number of dead and wounded.

The last ten days the British troops have gallantly fought their way through the Hindenburg line, capturing the village of Bullecourt, and the village of Rieux.

The German submarines were driven down in the air fighting yesterday. One other hostile machine was shot down in our lines by our anti-aircraft guns. Six of our airplanes are missing.

THE GERMAN STATEMENT.  
(BY ATLANTIC CABLE AND A. P.)  
BERLIN, May 13 (via London, May 13).—(British Admiralty per Wireless Press.) The great British attack, launched yesterday against the German positions on the Arras battle front, says the official statement issued today by the German army headquarters staff, has broken down. At Rieux the British were successful in forcing their way through the German lines, but at all other places they were repulsed after hand-to-hand fighting, suffering the heaviest losses. Fighting for possession of Bullecourt again broke out today.

GERMANS LOSE HEAVILY.  
(BY ATLANTIC CABLE AND A. P.)  
PARIS, May 13.—Troops commanded by the German Crown Prince this morning launched several violent attacks against the French lines on the Champagne front north of Rheims, on the plateau south of Craonne and in the region of Malmaison de Champagne. The official statement this afternoon says all the German attacks were smashed by the French artillery and rifle fire, the Germans suffering heavy losses.

## AMERICA'S BILLIONS AND FOOD SUPPLY EXPECTED TO TURN SCALE FOR ALLIES.

There will be no Starvation, Says Washington Authority—Yankee Ingenuity Relied Upon to Solve Submarine Problem, and People of the Country, United as One Man, are Determined on Suppression of Kaiserdom at Point of Bayonet—Already Machinery is Under Way for Creation of Vast Army.

(BY DIRECT WIRE—EXCLUSIVE DISPATCH.)  
WASHINGTON BUREAU OF THE TIMES, May 13.—Slowly, cautiously and with the calm deliberation befitting a great nation, the United States is stepping into the world-war arena. For three years this country has stood on the sidelines, watching the terrific struggle, the destruction of millions of men and billions of property, witnessing the agonies, trials and the supreme test of manhood and courage in the white hot crucible that will bring out the best and worst in the nation, but the best will survive.

## Later Dispatches With fresh news marked "30"

### MAKE LIFE A BURDEN FOR BRITISH STRIKERS.

(BY ATLANTIC CABLE AND A. P.)  
LONDON, May 14.—The strike of engineers in various parts of England continues. One feature of the movement is the vehemence with which the strikers are being condemned by other workmen. A great number of the strikers are young, husky fellows from 25 to 30 years of age, all of whom, except for exemption for special work, would be in the army. Their critics say the strike is nothing more than an attempt to dodge military service by hundreds of eligibles who fear their exemption is endangered by the abolition of the so-called trade-card system, which is their chief grievance.

This view is being rubbed into the idlers by taunts from uniformed soldiers and workers in other trades. The munitions girls have particularly scored them with sharp comment, and in many instances the strikers fled from their ire.

### CAMPAIGN AGAINST HOLLWEG.

(BY ATLANTIC CABLE AND A. P.)  
COPENHAGEN (via London) May 13.—The latest direct advices received here from Berlin confirm the impression that a vigorous campaign is being waged to bring about the downfall of Dr. Von Bethmann-Hollweg, the Imperial Chancellor. The movement has shown such strength that there was speculation when the news of the Chancellor's trip to headquarters became known Friday whether he would return as Chancellor or as a private individual. The friends of Dr. Von Bethmann-Hollweg, however, were absolutely sure that the Chancellor still possessed the full confidence of the Emperor, notwithstanding the efforts of the Pan-Germans and Conservatives to harass him on the question of electoral reforms and particularly on his failure to express a stern non possumus on the proposal of the Reichstag Constitutional Committee to change the method of the appointment of army and navy officers on the ground that it was undermining the throne and endangering the future of the Hohenzollern dynasty.

### BALFOUR VISITS ROOSEVELT.

(BY A. P. NIGHT WIRE.)  
NEW YORK, May 13.—Foreign Minister Arthur J. Balfour of Great Britain, head of the war mission to the United States, spent a somewhat militant Sunday, although it was supposed to be a day of rest for the weary envoys. In the morning the British statesman went to the cathedral of St. John the Divine, where he listened to a war sermon by the Rev. Dr. Charles H. Brent, Episcopal bishop of the Philippines. In the afternoon he went to Oyster Bay for a visit to Col. Theodore Roosevelt.

### AMERICAN DENTIST FOR KAISER.

(BY ATLANTIC CABLE AND A. P.)  
COPENHAGEN (via London) May 13.—Emperor William recognizes no state of war with the United States as far as his personal comfort is concerned. He has summoned an American dentist, Arthur Newton Davis of Piqua, O., to visit him at great headquarters this week and attend to the necessary repairs to the imperial teeth.

### BRUSSIOFF EXHORTS SOLDIERS.

(BY ATLANTIC CABLE AND A. P.)  
LONDON, May 14.—The Times' Odessa correspondent, telegraphing under date of May 9, says a great impression has been created by a recent speech of Gen. Alexis Brusiloff, commander-in-chief of the Russian armies on the southwestern front, complaining of the serious shortcomings of the army and deploring the agitation for a premature peace, the relaxation in discipline, the number of desertions from the army and the tendency of the Russian soldiers to fraternize with the enemy.

### PUBLISHERS TO PROTEST.

(BY A. P. NIGHT WIRE.)  
WASHINGTON, May 14.—Newspaper publishers are here today to protest to the Senate Finance Committee against the increase in second-class mail rates by application of the parcel post zone system proposed by the \$1,800,000,000 war-tax bill.

## CAN FOOD

## SURPLUS TO FILL NEED.

## Conserving Supplies and a Greater Production to Solve Problem.

[BY DIRECT WIRE—EXCLUSIVE DISPATCH.]

WASHINGTON, BUREAU OF THE TIMES, May 13.—The United States is to have a food controller with automatic power over distribution and consumption of all food products in home consumption or export to the Allies.

Back of this controller, but not with dictatorial powers over him, will be a food commission. It will have powers over the necessary machinery carrying into effect the orders of the controller and the right of suggestion.

President Wilson is to name the food controller and the members of the commission. It is certain almost that Herbert C. Hoover is to be the controller. Secretaries of Agriculture, Wilson, Labor, and War, Interior, will be members of the commission, which is to have as its membership also some leading agriculturists of the country, selected possibly from the directorate of the Farmers' Alliance and Grange.

EXTENSIVE PLANS. These are the plans for food conservation, distribution, consumption and control now being worked out by administration leaders in Congress. During the coming week, legislation to this end, backed by the President, will be started on its progress through Congress.

The President is insistent that it be pushed without delay. The argument in favor of haste is based on getting information that hoarding of food supplies and fuel has started among individuals with surplus cash. Perils of hoarding and warehouses are being stocked with supplies for two or three years with resultant unnecessary increase in price of commodities.

Director John Barrett of the Bureau of Latin America, says that the countries of Central and South America can decisively help if not completely solve the future food problem facing the United States and the European allies. He is preparing a report to the Council of National Defense. Features of the report are:

COVER SHORTAGE. The Latin-American countries, with wise co-operation and co-ordination in conserving supplies and extending production, will be able to take care of and provide against the very deficit or shortage in the production of the United States and its allies which might be fatal in an ultimate crisis.

Investigate Food Fire. SAULT STE. MARIE (Mich.) May 13.—Army officers have started an investigation of a fire which caused considerable damage to the quartermaster's building at Fort Brady late today.

DEORGANIZE SAV ARMY; PEACE FIRST THOUGHT. Germans will Soon Feel its Might, if War Doesn't End, Says Leader.

BY ARNO BOSCH FLEURET. [BY ATLANTIC CABLE AND DIRECT WIRE—EXCLUSIVE DISPATCH.]

BERLIN, May 13.—The revolution temporarily disorganized the army, but saved the republic. We are now reorganizing it, and it is only a question of weeks before the Germans again feel our might.

That could be accomplished if everybody in a position to help would do his part in that direction. As much as \$600,000,000 worth of food can be added to our supply this year by increasing the production of poultry, which would add meat and eggs to the table.

Charles Lathrop Pack, president of the National Emergency Food Garden Commission, said today that "conservative estimates show that 2,000,000 people have turned their attention to providing food for their own families. The people are learning the value of land as never before. In the campaign for a million gardens, hundreds of organizations are co-operating."

Among those working are the General Federation of Women's Clubs, with 1,500,000 members; the Christian Endeavor Society, with 2,000,000 members; the Rotary Club of America; woman suffrage leagues of a dozen states; the National League for Women's Service; and the Garden Club of America.

Among the business concerns assisting the emergency food garden commission are the National City Bank, National City and Bank of New York, and the Germania Life Insurance Company of New York.

COVER SHORTAGE. The Latin-American countries, with wise co-operation and co-ordination in conserving supplies and extending production, will be able to take care of and provide against the very deficit or shortage in the production of the United States and its allies which might be fatal in an ultimate crisis.

DEORGANIZE SAV ARMY; PEACE FIRST THOUGHT. Germans will Soon Feel its Might, if War Doesn't End, Says Leader.

## GERMANS TO SAVE SUNKEN VESSELS.

[BY ATLANTIC CABLE AND A. P.]

AMSTERDAM (via London) May 13, 11:57 p.m.—The problem of salvaging ships sunk by submarines is solved, according to the Hamburger Fremdenblatt, which says that German naval engineers have perfected a process of raising ships from the bottom of the sea. Details are withheld, except that specially equipped salvage vessels will be employed and that they will be able to operate even in stormy weather.

## GERMANY REPORTS BELGIANS TO WORK.

[BY ATLANTIC CABLE AND A. P.]

HAVER (France) May 13.—Information officially received by the Belgian government is to the effect that all males between the ages of 15 and 65 in the Belgian province of Luxembourg have been deported for work in France and Germany in the environs of the frontier.

A census of women also has been taken. The able-bodied will be compelled to work in the field, replacing men, mothers with infants will be sent to work in the factories, and the others will remain at the disposal of the German authorities. In no case is no distinction has been made regarding social standing.

## RUSSIAN WORKERS FAVOR AGREEMENT.

[BY ATLANTIC CABLE AND A. P.]

LONDON, May 13.—M. Skobeleff, a member of the Executive Committee of the Council of Workmen and Soldiers' Delegates, according to a Reuters' dispatch from Petrograd, asserted in his speech Saturday, that the committee of which he is a member is opposed to a separate peace. It was of the opinion that the war might be ended by an agreement between the German and Russian democracies. For this reason, he said, it proposed to enter into a joint conference with representatives of German democrats at the International Socialist conference.

Preparations. [BY ATLANTIC CABLE AND DIRECT WIRE—EXCLUSIVE DISPATCH.]

SAULT STE. MARIE (Mich.) May 13.—Army officers have started an investigation of a fire which caused considerable damage to the quartermaster's building at Fort Brady late today.

## Los Angeles Daily Times.

## America's Billions.

(Continued from First Page.)

country that produced the airplane and the submarine will also produce an antidote or something better. (3.) The food situation in this country will be solved. This country must feed itself and half the world or more besides and will do so.

Back of it all is the great strength and sustained faith that the United States is not entering the war from a spirit of greed or for purely selfish ends, but purely on the side of humanity.

There is no desire or intention to trample upon the rights of any nation, to take from any nation anything in the way of territory or treasure. Uncle Sam goes in with a clean conscience and a clean hand.

Committed to war and with a definite declaration and purpose to win, the American people may as well bring themselves to a quick realization of the situation. It will be a short war. The collapse of Russia puts tremendous added burden upon this country.

Best information is that little can be expected from the Russian giant among the nations for a time. There is no need of central power in Russia. The present socialistic movement, which always fails, is running rampant and the worst and weakest elements of the nation will be straightened out and there will emerge from the present chaos a new and better nation.

There may be other developments very soon. The Russian giant will have the eventual success of the Entente Allies. A high official in the Russian government recently remarked that it would be no one, with the possible exception of the German powers, that about the time Germany pushed across the Russian border from one direction, the Japanese, in great force, would suddenly appear on the other border.

Japan has been eager to send troops to the front, and has repeatedly offered to send trained soldiers to strengthen the French lines. It may be that the Entente Allies have been offered the offer, but have stipulated that the Japanese shall "do their bit" on the Russian coast.

Concerning the submarine menace, the most serious question, it is felt a solution must be found. It will be found very shortly. Guarded statements by British, French and American authorities lead to the belief and are borne out by admissions by the German Admiralty that the submarine campaign is being lost through new devices and methods employed by the Entente. There is a decrease in the activities of the submarine, although it must be admitted that they have swept the seas of hundreds of ships and vessels of commerce.

It is intensely gratifying to realize that the United States, made up of all peoples of the world, has rallied to the cause of the world. Germany had hoped her children in this country would betray their adopted country, and engage in a civil war. But the people of this country have stood by their adopted country and have taken deep root in the soil of this country.

There have been more promising crop prospects than the present, but the United States will grow more foodstuffs this season than ever before in the history of the country. This does not apply solely to the great cereal crops—wheat, corn and oats—there may be a shortage in the wheat crop. This, however, will be more than offset by the increased acreage of potatoes, onions and small grains. Furthermore, economy will prevail, something that has not been known for years, and the nation will be better for the experience. Experts have said that Americans throw into garbage cans more food than they eat. There will be much less waste hereafter and this will mean more food for the hungry.

Two submarine sheds were blown up. Sixty-three persons were killed. Thirty others were taken to hospitals.

and golf links are being devoted to the cultivation of potatoes, beans, cabbage and onions. Men who have been accustomed to luxury all their lives are now working in the gardens.

Women have laid aside society affairs to give their attention to the same work. Systematic work along this line is being conducted by millions of school children and the result will be a vastly increased supply of food and a stronger and harder people. The American people will not starve nor will they permit any other nation to starve if food can be placed within their reach.

It is well for a nation that it is forced to face hardships and self-denial and practice economy and saving. Americans have gone along for generations in a soft and luxurious manner, giving scant heed to the future. Now they must think and act. They must be prepared to do the work with no thought but of success. It may even result in the United States becoming a more efficient nation.

In any event, having three years in which to count the cost and study the situation, the American people have decided to go in and win and they will win. The "Illinois" idea of economic control, which sprang into being Saturday, is being copied by all other great Middle Western States.

It is backed by men like J. Ogden Armour, who has been a leader in the United States since 1914. It is backed by John A. Spoon, head of the Union Stockyards, largest distributor of meat in the world. Samuel Insull, largest distributor of electricity in the world and other equally big men. Briefly, this is the "Illinois" idea.

For scope it surpasses any measure taken in this country. In magnitude, it eclipses any single conservation measure passed by the nations that have been battling since August, 1914.

It proposes to tear a leaf from the book of Europe. It urges that America, in controlling its resources and necessities, start right off at the same advanced point it took Great Britain and France more than two years ago in the war started.

GRAVEST DANGER. The gravest danger this country now faces can be speedily remedied by the adoption of the "Illinois" plan. It is a plan that will save the country from economic disaster and will enable it to win the war.

It is intensely gratifying to realize that the United States, made up of all peoples of the world, has rallied to the cause of the world. Germany had hoped her children in this country would betray their adopted country, and engage in a civil war. But the people of this country have stood by their adopted country and have taken deep root in the soil of this country.

## ARIZONA PASSES FIRE.

Republicans Succeeding Democrats in Many State Offices.

PHOENIX (Ariz.) May 10.—Though preparations are being made to carry the Governorship contest into the State Supreme Court, Democrats at the State Capitol are beginning to hand in their resignations. Lon L. Hatton, R. G. Brady and J. W. Norton have resigned as members of the Live Stock Board and have been succeeded by J. A. Johnson, a Democrat; Frank F. Moore, a Progressive; and E. A. Crab, a Republican.

Also retiring are the members of the State Board of Education, including John Hennessey of Flagstaff, William Morgan of Apache county and A. M. Jones of Yuma. Their places in the Governor's cabinet have been taken by Scott of Pinal county, George Campbell of Mohave county and N. J. Ritter of Jerome county.

Joe V. Prochaska of Miami, Republican candidate in the last election for the office of Secretary of State, has accepted the post of State Game Warden, succeeding G. W. Willard, who has resigned without comment. Mr. Willard has been one of the strongest of the Hunt party.

Also retiring are the members of the State Board of Education, including John Hennessey of Flagstaff, William Morgan of Apache county and A. M. Jones of Yuma. Their places in the Governor's cabinet have been taken by Scott of Pinal county, George Campbell of Mohave county and N. J. Ritter of Jerome county.

## END OF JULY MAY SEE OUR ARMY IN FRANCE.

Wilson Decides to Send Expedition as Soon as Possible and General to Command is Already Picked.

WASHINGTON, BUREAU OF THE TIMES, May 13.—Moved by the pleas of Marshal Joffre and other members of the French and British war missions, President Wilson has decided to send American troops to the front as soon as it is physically possible.

The War Department has been instructed to rush all plans to carry out this object and army officers predicted today that American troops will be on French soil before the end of July.

The President is giving his attention to the selection of a general to command the first contingent. The censorship forbids mention of the name of the man who appears most likely to be chosen, but it can be said that he is a general of long plan, who has achieved a most creditable record in recent military history. He has been summoned to Washington to confer with the President.

The present plan is to send from two to four divisions of troops, numbering from 15,000 to 115,000 men. It is probable that about one-third will be seasoned regular army men and the remainder National Guardsmen and volunteers.

Regulars are to be included in the expeditionary force to furnish a stable nucleus of trained men. In expanding the regular army the War Department is already separating regiments into three battalions, each of which is to form the nucleus of a new regiment.

PICK OF GUARDSMEN. The guardsmen selected for the expeditionary force will be the pick of those who received training on the Mexican border last year. The remainder, according to the present plan, will be chosen from the National Guardsmen or some similar body.

Army officers deem it probable that Col. Roosevelt will be allowed to go with the first body of troops, but not as its commander. The practical military men of the War Department say he is a man of the highest caliber and a man of the highest caliber.

That the colonel will raise several divisions of volunteers and get to the front line in some command, high or low, is the confident prediction of his friends here since the President's announcement. He will be accompanied by a large staff, including the Roosevelt amendment, despite its previous disapproval of the Roosevelt amendment, and despite the opposition of the administration.

The Roosevelt amendment, which does not require the use of volunteers, but rather more than four volunteer divisions. Mr. Wilson, therefore, might refuse to call the volunteers into service, but, say the Roosevelt men, if this amendment becomes law, the colonel will proceed to enroll volunteers with the result that the President eventually will be compelled to consent to the service and send them abroad.

GAME FOR ELKS.

[BY A. P. NIGHT WIRE.]

STOCKTON, May 13.—The Los Angeles Elks yesterday continued their unbroken string of wins with a 7 to 4 victory over San Diego. Burnett won the game with a double. Stewart and Blue were the opposing moundmen, with Burnett and Howell doing the backstopping. The athletes motored to San Diego, and were accompanied by a large delegation.

## ANGELS GET KENWORTHY.

[BY A. P. NIGHT WIRE.]

PORTLAND (Or.) May 13.—Purchase of infielder William Kenworthy from the St. Louis Americans was announced by Frank Chance, manager of the Los Angeles Angels, today.

## On Food Situation.

The food situation will be considered at a meeting of the School Hygiene Association at 4 o'clock this afternoon at the Olive-street school. Speeches will be delivered on "Red Cross Dietetics" and "Our School Children's Diet."

## For Red Cross.

The Modern Drama Players, assisted by several musicians and students of the University of California, will present an entertainment in the auditorium of the Young Men's Christian Association, the evening of the 24th inst., for the benefit of the Red Cross.

Examinations Announced.—Notices that an examination will be held the 22nd inst., for a chief engineer, steam, at the County Farm, and the 25th inst., for a food inspector for the County Health Department, were sent out yesterday by the County Civil Service Commission.

To the Guest of Honor.—Miss Mary Florence Denton, who was for many years head of the Daughters of the Empire, in Kyoto, Japan, will be the guest of honor at a luncheon today, and at 1:30 p.m., will address the society in one of the classrooms at the Bible Institute.

Norwegian Liberty Day.—The Norwegian Liberty Day will be celebrated by the Los Angeles Auditorium at 8 o'clock next Saturday night. Rev. O. A. Dohlgren and Adolf Larsen will be the principal speakers, and a musical program will be given, followed by refreshments and Norwegian national games. All Scandinavians are invited.

## Cortes Flag Still Here.

The famous Cortes flag, owned by Dr. Fernandez y Arizaga, is still in Los Angeles and will be continued on exhibition at the old Plaza Church today and tomorrow. It will then be taken north for exhibition at Santa Barbara, Monterey, San Francisco, and at the University of California and Stanford University. During the past week many prominent persons have seen this notable flag.

## For Patriot's Widow.

Mrs. Sheehy Skeffington, widow of the Irish patriot who was executed during the Dublin revolution, was the guest of honor at a reception tendered her last evening in Knights of Columbus Hall by the Ladies' Auxiliaries of the Ancient Order of Hibernians. An elaborate program was rendered, with Miss Margaret Phelan presiding as chairman of the evening.

## NEW RULING WILL

## HELP FOOD CAMPAIGN.

## [LOCAL CORRESPONDENCE.]

PORTERVILLE, May 12.—An order of the Railroad Commission just issued will have the effect of putting in operation upward of 500 pumping plants in various parts of Tulare county, which have been idle during the past year. A large acreage of unproductive land will be added to the area available for food crops.

Under the terms of the new ruling modification is made in the rates which may be granted by electric power companies to consumers on short-time contracts.

## OFFER SANATORIUM

## TO THE GOVERNMENT.

## [LOCAL CORRESPONDENCE.]

MENTONE, May 12.—The St. Thomas Aquinas Sanatorium at this place has been offered to the government as a place for the treatment of tuberculosis patients and convalescents during war time. The offer was made in a letter addressed to Surg.-Gen. Gorgas, U.S.A., at Washington, from Dr. Gayle G. Mowley of Redlands.

The sanatorium is at present under the management of the Sisters of Mercy, but is owned by Redlands doctors. The old hotel here was purchased several years ago and fitted up for this work. The sanatorium is one of the best equipped in the south.

## GETS FRANCHISE CHEAP.

## [LOCAL CORRESPONDENCE.]

VIRALIA, May 12.—The Central California Gas Company bought at auction from the county of Tulare a franchise for laying gas mains along certain public highways, paying \$1.94 for the privilege. This company now is pending before the Railroad Commission an application for authority for an issue of stock in sufficient amount to finance a pipe line for conveying natural gas from the Kern River oil fields to consumers in this county.

## MUNITION WORKERS' DISEASES.

## Dust from the Poisonous Explosives Causes Destructive Maladies.

## [New York Sun.]

The high pressure under which the production of munitions has had to be performed has brought with it destructive maladies. These are particularly noticeable in connection with the manufacture of high explosives. Thus, in handling trinitrotoluol after a prolonged period one becomes drowsy and from frontal headaches, and if work is continued in the vicinity of which the wings and bodies of airplanes are treated. Tetrachlorethane enters largely into the preparation of this varnish, and this throws off a noxious vapor which produces drowsiness and loss of appetite, and if work is continued in ultimately jaundice, liver complications and coma. In this case an alternative varnish has been discovered which is free from the evil constituents; but it has not come into general use for the simple reason that there are insufficient supplies of the necessary ingredients to meet demands.

## A Bright Youth.

[Pittsburgh Chronicle-Telegraph:] Caller—So your son, Willie, has started to work as an office boy. How is he getting on?

Fond Mother—Splendid! He already knows who ought to be discharged, and is merely waiting to be called to see all his old friends and make new ones.

Daily Horror.  
HUNGRY PEOPLE  
IN HUNGARY.

## FOOD IS DOLED OUT AT THE MARKETS.

Friendly Officials and Sharp Tricks Sometimes Enable One to Secure a Little Extra Dole, but Everyone is Placed by the Rations Brought on by the War.

[Foreign Correspondence Boston Transcript:] The wife of a high Hungarian state official describes life of the best-off—everywhere in Austro-Hungary same picture, difference only depth of shadows. Emperor Charles most bitter about these sorrows, viewing the talented woman's picture—signed, "Ego"—Pest Naplo, these seven days, the costume, takes her basket and starts off on her errand of tortures. Mary gives instructions to "Dole" for the sugar, Madame, and get some wood, for heaven's sake, for we have none left. The police, however, are of the housewife only sighs and walks slowly off. At the meat market she can choose from among liver, heart, true meat she has not been able to buy for months, unless you call giblets of rabbit real meat.

"Then comes butter. She takes her place in the queue. They give two ounces at the end of the line. It is the law. The good housewife breaks it. After fifteen minutes' wait in the queue she comes, walks off, turns back the weather-worn wings of the bird on her bonnet, takes her place in the queue again, waits another fifteen minutes, and then gets two more ounces. This procedure she repeats with her bonnet off and her coat turned inside out, and gets a third portion. All this takes up forty-five minutes of her time, but she has six ounces of butter.

"With potatoes she was most fortunate. In the policeman, who watches over the vendors and sees that they keep the regulations, she has recognized the husband of one of her former servants. She shakes hands with him, inquires about his wife and children, and the policeman, taking her basket, says: 'I will give you six pounds of potatoes into it. Otherwise she could only have had two pounds, and then she would have had to wait thirty minutes of waiting. Then follows her worst experience. The grocer who always buys her sugar, says she is joking when she pleads for a half pound. He can only let her have a quarter of a kilogram, but she had half a pound only a week ago. She is on the edge of despair; without sugar, the children do not drink tea. A good angel comes to her rescue in the shape of one who looks like a charwoman, but dressed as if well-to-do, and smiling happily: 'I kiss your hand, Madame,' she says. 'Don't you recognize me? I am Mrs. Blum, who used to come to your house to clean steps and do work about the house.' 'Oh, yes, my dear,' she says. 'Thank you very much. I bought up \$7.50 worth of shoe laces last year, and now we are, quite all right. My husband and I are quite all right. My husband is a whole pound if you'd like.' It meant doing without for a week, but she saved. The housewife almost returned the hand kiss of her late charwoman.

"Then follows another hour's wait for some food, but there is none to be had. She has almost everything now in the way of food, but no wood to cook it with. The janitor gives her a few pounds for good money, and she is able to get a small amount of coal. The housewife almost returned the hand kiss of her late charwoman.

## ANOTHER TELEPHONE MERGER UNDER WAY.

(LOCAL CORRESPONDENCE.)

SAN BERNARDINO, May 13.—In an effort to prevent the threatened curtailment of free telephone service between this city and Colton, Highland, Rialto and other nearby places as a result of the pending merger of the two companies operating in the San Bernardino Valley, City Attorney William Guthrie has wired the State Railroad Commission that this city desires to

Roy Holt, Mrs. A. L. Richmond, Mrs. O. G. Horne, Mrs. Violette Campbell, Mrs. William P. Hall, Mrs. Joseph Seymour, Mrs. W. S. Fawcett, Mrs. Robert W. Campbell, and Mrs. A. H. Griswold. This executive committee will meet tomorrow evening in the Chamber of Commerce rooms to perfect organization. More than 200 men, and women have already signified their desire to join the organization.

[LOCAL CORRESPONDENCE]  
REDLANDS, May 13.—The fruit growers of Southern California are selling the effects of the agitation for a maximum food production and the conservation of the food supply for war use, for orange prices have come down steadily in the past few weeks in the face of a much smaller amount of fruit placed on the market. Fruit men say that there is great

Oranges are selling lower now than they did a year ago at this time, and it is claimed that the only reason

(Undermines; Second  
Floor)

There are about 900 cars of oranges in the district to be shipped to Valencia. They are Valentias, sweet and some few navels. It is hoped that the influence of the talk for a tariff will be counteracted by common sense and that while people will save they will not neglect to buy the fruits which their health demands.

Fruit men say that they are in a peculiar condition. The farmer can raise a crop that will be in demand, but the fruits are perishable and must find a ready market, and not only that, but the land that is

The total shipment of oranges from the Redlands district now is 13 cars, almost 100 cars more than were shipped all last season. The growers who have Valencia's do not ship their fruit until late in the summer, and they hope by that time that people will see the necessity of practicing the right kind of thrift.

Fruit men will probably get together soon and work out a plan to be presented to the government for a proper marketing facilities.

## Progress of the Southwest's Great Mining Revival—Latest Developments Chronicled

## MAY INCREASE CAPITAL SOON.

Meeting on Jerome-Verde Project this Week.

Strike Copper Glance of High Per Cent.

Developments at Tucson and Globe Camps.

(SPECIAL CORRESPONDENCE.)  
JEROME (Ariz.) May 11.—Drilling has demonstrated that Jerome-Verde has at least two and a half feet of glance that runs 26 to 32 per cent. copper. While this is not as good as the indication that this is a stringer from a great ore lens, such as that struck in its neighbor, the Extension. To provide funds for proper development, the company is about to sell 100,000 shares to its stockholders at \$2. At a stockholders' meeting in Phoenix, May 17, will be considered an increase of the capitalization by \$500,000 shares, added to the present \$500,000.

Drilling is to be started soon on the Arizona and Arizona projects on which lateral development on the 1440 level is being hastened as much as possible under encouraging conditions.

Jerome's strike has struck a considerable flow of water at 235 feet, in a vein opened by that in the dry bottom of the shaft, which was being sunk with notable speed.

Dundee is waiting for electrical sampling machinery, which is expected to be in place within a month. The shaft is to be lined with concrete, to keep out water, which has been coming through a much fractured section. Shipments continue of surface ore that averages 7.25 per cent. copper and that returns net profit of \$20 a ton.

Jerome-Superior will sink a two-compartment shaft on a claim near the Verde crushing plant.

Verde-Superior has received a power and compressor plant.

"Verde" will be the name of a new town, to be placed by the Verde Extension Company on ground near its smelter, about six miles from Jerome.

SWANNEA AFFAIRS.  
PLEASANT OUTLOOK.  
(SPECIAL CORRESPONDENCE.)

TUCSON (Ariz.) May 11.—The affairs of the Swansea mine of northern Yuma county, have been considered in the United States Court here, on application of the trustee in bankruptcy for permission to pay off current indebtedness with interest and costs, and to turn the property back to the Swansea Consolidated Mining Company, with full discharge from bankruptcy subject only to a mortgage indebtedness of \$1,000,000. A court order is expected within a few days.

The trustee now has on hand about \$150,000, which will pay off the balance of floating debt and leave about \$250,000 in the treasury, with income steadily accruing from sale of ore.

In court, W. T. Craig and Burton Wyle of Los Angeles represented, respectively, the trustee and the corporation.

The Swansea company has outstanding about \$800,000 shares, a majority held in northern France, Holland and Belgium. At the time of the corporation's collapse, over two years ago, President Penas, a resident of Lille, France. Nothing has been heard from him for months past, and it is believed he has been killed in the war, which had enveloped his home.

Last month at a stockholders' meeting, held in Los Angeles, William Schutte of Amsterdam, Holland, was elected president, through the vote of a large part of the European stockholders, here represented by J. G. Yondersekamp.

It is generally understood that a proposition for a half-interest lease to the Clarke of Los Angeles has been favorably considered by the stockholders' representatives, though little has been said on the subject by the attorneys.

INSPIRATION REPORT.  
RESULTS INSPIRING.  
(SPECIAL CORRESPONDENCE.)

GLOBE (Ariz.) May 11.—The annual report of the Inspiration Consolidated Copper Company deals in immense figures, involving the largest tonnage of any mine operated in the Southwest. Under date of March 31, it gives figures for the past calendar year.

No ore development work was done during the year, which started with \$7,143,000 tons developed. Of this supply, 5,353,880 tons were hoisted and milled. Almost all the ore was from the Inspiration division, the Live Oak and Keystone sections being left for future consideration.

The company owns 4216 acres, but considers only 1870 acres as mining ground. The year's underwriting amounted to eighteen and four-tenths acres, twenty-eight miles of openings were driven and thirty-one miles caved in the mining operation.

The daily mill average for the year was 14,850 tons, with an average of sixteen and five-tenths tons in operation. During the past month, however, the twentieth section has been started and something over 30,000 tons a day is possible for both mine and mill. The daily average for 1916 per section was 897 tons.

From the sulphide ore, through the application of flotation, was made the remarkable recovery of nearly 91 per cent, compared with over 78 per cent, in the earlier Arizona mills. Some carbonate and oxide are mixed with this ore and so the general average is depressed. The management is studying plans for handling these oxides and is building a second acid-treating plant, that may show possibility of profit in the mining of millions of tons of such ore considered of no present value.

The ore averaged 1.848 per cent. copper, of this 1.15 being in oxide combinations. This gave for the year a gross return of 126,772,637 pounds of refined copper, at a cost for the concentrating ore, of \$4.73.

cents. The mining cost was 60.6 cents per ton.

Copper sales aggregated \$33,496,343, at an average price of 25.393 cents a pound. Net profit was returned of \$2,629,433, after payment of \$401,407 income tax, \$151,033 interest and the charging off of \$750,000 as depreciation.

The Inspiration company is fencing in its tailing lands, below the mill, and proposes to plant as much as possible to food crops, particularly fresh vegetables, so keenly needed in any mining camp.

Surprise.  
HITS HIGH GRADE.

Manhattan Company Encounters Unexpected Richness in Drift on Six Hundred Level—Rumor of Deal.

(SPECIAL CORRESPONDENCE.)  
MANHATTAN (Nev.) May 11.—Manhattan sprung a sensation early this week by opening a body of high-grade that was a great surprise for the management. There was no reason to expect anything better than a good milling ore similar to the findings in the earlier sections of the mine. The ore body was uncovered on the 600 level in the east drift thirty feet from the shaft where work was started only two weeks ago after dewatering the mine to the 600 level. In a raise from this drift the ledge was cut for a width of seven feet. Half the face assayed \$144 per ton, and the remainder ran at the rate of 175.

The ore is being taken to the company mill situated about a mile from the shaft, where it will be treated, as it is amenable to the cyanide process and does not require any special roasting. The mill is operated now on a custom basis but by the middle of the month Supt. Durkee expects to have at least 500 tons in the bins ready for the beginning of work on company account to continue indefinitely.

It is reported a tentative offer from the same interests that control White Caps and Manhattan Consolidated. However this may result the company is in splendid position for a long haul.

Manhattan Consolidated is cutting station at the 311-foot point, with the object of driving to cut the White Caps ore body in the face of the station. Careful surveys have established the fact that the ledge runs at this part of the shaft, and time will be gained by following it laterally instead of continuing sinking to the 400 point as at first proposed.

Development on the third level in the White Caps has made steady progress. The east drift has been extended a distance of thirty-five feet further than the point given in the preceding report, and its face still continues to go ahead in caliche shale, in which are encountered some stringers of calcite. During the same period, the west drift advanced a distance of thirty-seven feet, notwithstanding the fact that the face of the drift is breaking, through faulted material.

ORDER LEACHING PLANT.  
Navajo Shipping Rich Ore to AM Operating Fund.

(SPECIAL CORRESPONDENCE.)  
FLAGSTAFF (Ariz.) May 11.—A 500-ton leaching plant has been ordered by Manager Robert Mitchell for the Navajo Copper Company mines, 125 miles northeast of Flagstaff, twelve miles from the Colorado River. To provide operating funds, heavy shipments of the richer ore are being made to El Paso, some of it running up to 35 per cent. copper. Surface ore running 3 to 10 per cent. have been cut in an immense body by open workings.

Transportation is the main problem, as it has become necessary to resort to caterpillar tractors, ordinary motor trucks and wagons in sequence, before the ore is loaded upon cars at the end of the Greenlaw logging railway. The trip consumes five days.

FIGHTERS STILL.  
VETERANS TO HAVE BATTLE OF VOTES.

KEEN ELECTION CONTEST WILL MARK ENCAMPMENT.

Two Los Angeles Aspirants for Post of Department Commander Base Fight on Location of Headquarters—Many Visitors to be Entertained at Beach.

There will be a battle-royal at Long Beach tomorrow and Wednesday, when G.A.R. veterans of the department of California and Nevada will meet at their fifteenth anniversary encampment, to elect officers for the ensuing year. The battle will center on the election of a commander, for on the choice depends the location of the department headquarters. Headquarters have been at the San Francisco for years and the Los Angeles veterans are determined to have this honor.

The contending candidates are C. H. Haskins and R. H. Martin, both of this city. Comte Haskins stated last night that he is determined, if elected, to bring the headquarters to this city, while Comrade Martin is understood to be depending on the support of the northern delegates. This is interpreted to mean he will not change the present location of headquarters.

The veterans will assemble at the Long Beach auditorium tomorrow morning and headquarters of the various departments will be at the Hotel Virginia. There will be six organizations in attendance and fully 1400 delegates are expected.

One of the features of the meeting will be a patriotic parade which is expected to be the largest ever out of the G.A.R. held in Southern California in years. Elaborate preparations are being made to entertain the visitors.

Meeting with the veterans will be the Women's Relief Corps, Ladies of the G.A.R., Sons and Daughters of Veterans and Sons of Veterans Auxiliary.

Try Marine Remedy

For Red, Weak, Watery Eye, Granulated Eyelids.

Chloride.

STOCKHOLDERS ARE PLEASED.

They Find Conditions to Suit in New Camp.

Bobby Burns Nearing Vein; Surface Ore Returns.

Copper Age Mill to Operate in Few Weeks.

(SPECIAL CORRESPONDENCE.)  
CHLORIDE (Ariz.) May 12.—A party of prominent stockholders in the Arizona-Chloride Mining Company visited camp this week to look over the properties they are interested in. They expressed themselves with being more than pleased with the work that is being done on the various claims of the company and the efficiency of the management.

John B. Hughes, president of the Arizona-Chloride, states that the corporation is completely financed for all development work now contemplated and by the time that surface plant has been carried out there is no reason to doubt but that the Arizona-Chloride will be recognized as a big mine.

Low in Zinc Value.

MONO LAKE, April 27.—Q: Sample No. 1 I have tested out in the presence of a chemist and found a little gold and a dark metal is left. Aqua regia dissolves both. Is the dark metal platinum or not?

A: We fail to detect platinum in No. 1 and 2. No. 1 is calcite chiefly; chlorite present, trace of zinc and phosphoric acid indicated. No. 2 is hornblende with iron silicate; manganese trace, chlorite trace and zinc low per cent.

Not Sylvanite.

PERRIS, April 23.—Q: Please tell me what minerals or metals are in the two samples. No. 1, I think is antimony and No. 2 is pyrite. Thanking you for past favors.

A: No. 1 is hornblende. No. 2 is not sylvanite and tellurium is absent. Simply quartzitic rock with microscopic hematite and manganese dioxide in minute streaks.

Cinnabar Absent.

CALEXICO, April 23.—Q: Please tell me the sample mailed with me and greatly obliged.

A: The bright-red coloring material is but iron peroxide, "Indian paint." If you please, and the sample is of iron ore, chiefly. Manganese trace.

Shaly Limestone Carbonate.

CARPINTERIA, April 28.—Q: I am mailing you today a sample of what I think of mine calls "soapstone" or talc. Will you kindly give me an opinion of the specimen, if it is not soapstone, say what it is. It has no commercial value. I am a regular reader of your paper? M.

A: The sample represents material that has a low value as a fertilizer. There is a trace of phosphoric acid in the sample, with some silica and low per cent. magnesia.

Hornblende and Lead.

LOS ANGELES, April 28.—Q: I am sending you four specimens from Eastern San Bernardino county. No. 1 (yellow mineral) what does it consist of? Does No. 2 carry any valuable mineral or metal other than lead, silver, platinum? No. 3, pans a yellow mineral; what is it? No. 4, clay; any value? B.

A: No. 1 is of carbonate; low in lead, silver, platinum. No. 2 is lead oxide, and wulfenite (lead sulfide) present. No. 3 is a lava-like substance, carrying some lead. The yellow is chiefly ferrous and ferric oxides with zinc present. No. 4 is a clay, with no value for filtering oils, etc. There is one other No. 1 which is simply hornblende.

Calcite.

BARSTOW, April 28.—Q: Under separate cover I am sending you a sample that I would like to have tested for borax. Thanking you in advance.

Ferruginous Quartz.

PASADENA, April 28.—Q: Please assay for gold, silver and copper.

A: Copper absent. Free gold trace. For other gold values and silver you are politely referred to assayers.

Impure Calcite.

SALOME (Ariz.) April 29.—Q: Will you please classify and test the sample of ore that I am sending you today under separate cover?

A: The sample carries lime, magnesia and impure fuller's earth. Water-soluble potash absent.

Feldspathic.

LOS ANGELES, April 29.—Q: Once more I come to the bat. Impure feldspar dyke like the sample. Can you give me a degree of assay how only trace of 32 cents per ton ore. Sample taken from about eight feet in tunnel. How would you classify the sample, and do you think the gold values would justify a tunnel of 100 to 150 feet, or would you consider it possible for values to increase to milling grade? Water is available, and ten miles to railroad. Several parties interested in your reply.

A: The tunnel to which you refer may be simply work done on assessment. The sample is of quartz with some feldspar, and yet not strictly pegmatite; some garnet present, and stained with iron oxide. Assays are of but little practical value for free-milling tests.

(2) Your only safe plan, no matter what the locality, is to take several tons of the ore to a stamp mill and get practical results in gold or valuable tonnage or otherwise.

Simply Hornblende.

ATOLLA, April 30.—Q: I am sending you by this mail two hard chunks of black ore. Kindly inform me of any value.

C.

Doubtful Ore.

CARLEBAR, April 30.—Q: Under a separate cover I am sending you a sample of ore. I long time and know what it is. It looks like it might contain silver or lead, or both.

Interested in some mining claims in California I have heretofore sent samples to you for analyses. I hope I am not imposing on you by sending so many samples at once. The samples under separate cover are from San Diego county. Nos. 1, 2, 3 and 4 are from near Julian, and taken from very large dykes, and would like to know if they carry lead or other values. What is No. 1? Thanking you for any information that you will give, I will wait to read your description of the samples in the Earth. A.

No. 1 to No. 4 look very much like the rock they get platinum from in Nevada. Is it not the same as the "platinum" Nevada ore? Platinum not present in any of your samples. No specimen resembles the plumbogummite of Nevada. No. 1 is a black tourmaline in the mass, and the other is porphyritic tourmaline (fine grained and microscopical tourmaline present). No. 2 is microscopical tourmaline, and the other is sulphate. No. 3, ferruginous (and decomposed) quartz. No. 4, quartzitic rock. No. 10, quartz; traces of limonite, manganese-iron; traces of microscopic pyrite and of galenite. No. 11 is quartz.

Low in Zinc Value.

MONO LAKE, April 27.—Q: Sample No. 1 I have tested out in the presence of a chemist and found a little gold and a dark metal is left. Aqua regia dissolves both. Is the dark metal platinum or not?

A: We fail to detect platinum in No. 1 and 2. No. 1 is calcite chiefly; chlorite present, trace of zinc and phosphoric acid indicated. No. 2 is hornblende with iron silicate; manganese trace, chlorite trace and zinc low per cent.

Not Sylvanite.

PERRIS, April 23.—Q: Please tell me what minerals or metals are in the two samples. No. 1, I think is antimony and No. 2 is pyrite. Thanking you for past favors.

A: No. 1 is hornblende. No. 2 is not sylvanite and tellurium is absent. Simply quartzitic rock with microscopic hematite and manganese dioxide in minute streaks.

Cinnabar Absent.

CALEXICO, April 23.—Q: Please tell me the sample mailed with me and greatly obliged.

A: The bright-red coloring material is but iron peroxide, "Indian paint." If you please, and the sample is of iron ore, chiefly. Manganese trace.

Shaly Limestone Carbonate.

CARPINTERIA, April 28.—Q: I am mailing you today a sample of what I think of mine calls "soapstone" or talc. Will you kindly give me an opinion of the specimen, if it is not soapstone, say what it is. It has no commercial value. I am a regular reader of your paper? M.

A: The sample represents material that has a low value as a fertilizer. There is a trace of phosphoric acid in the sample, with some silica and low per cent. magnesia.

Calcite and Iron Oxide.

LOS ANGELES, April 30.—Q: Kindly tell me what this contains.

MRS. W.

Free Gold Absent.

LOS ANGELES, April 30.—Q: Kindly tell me what this contains.

MRS. W.

Potash Low Per Cent.

NEEDLES, April 30.—Q: Please test No. 1 for potash. Nos. 2 and 3 are what, please? G.

A: No. 1, potash traces. No. 2, barite. No. 3, calcite chiefly; strontium traces.

Red Specks Cinnabar.

TEHACHA, April 29.—Q: I am sending you under separate cover samples from a shaft about twenty-five feet deep from a cinnabar property northwest of Tehachas. The water in the shaft has a green color, and the tools when left in over night become a vivid green. All of this ore will pan a little cinnabar, and some can be seen in the rock. Thinking for you many kindnesses.

"SUBSCRIBER."

A: The rock is altered dolomite and carries cinnabar observable with the naked eye. The matter that covers the iron parts of tools is not from material like sample. It is probably the complex ores of copper, iron and manganese, which are being naturally leached in the waters of that shaft.

Varieties of Iron.

TEHACHA, April 28.—Q: I am sending you an ore sample. I know it is iron of some kind, but it may carry something of value. M.

A: The sample is of "pitchy iron" in part, limonite, hematite and titaniferous-iron present. Manganese trace.

Native Gold.

TUCSON (Ariz.) April 30.—Q: Herewith a small sample that carried native gold. I am sending it to the blacksmith matter in the sample is tellurium. Is it tellurium?

A: There is not a trace of tellurium in the sample. The matter you refer to is limonite (titaniferous iron).

Can You Afford the Risk?

Were you ever seized with a severe attack of cramp colic or diarrhoea without a bottle of Chamberlain's Colic and Diarrhoea Remedy in the house? Don't take such risks. A dose or two will cure you before a doctor could possibly be called, and it never fails even in the most severe and dangerous cases.

Every American Should See Yosemite Valley at Least Once!

OVER-HANGING ROCK—GLACIER POINT

The Times Excursion To Yosemite Valley

THE TIMES PARTY IS TO LEAVE MAY 19

Via the Santa Fe Railroad. It will arrive at Yosemite the next day and will stop in the valley from the 20th until the 27th inst.

The party will arrive in Los Angeles Monday morning, May 28.

For Further Information Address

The Times Excursion Department

Telephones—MAIN 8200 HOME 10391

TIMES BUILDING—FIRST AND BROADWAY

An attaché of Desmond's Park Service is at The Times daily between the hours of 1 and 3 p.m.

Please let me know if you think it has any value.

A: The sample is one of those odd combinations that often occur in doubtful precious metal mining districts. It shows, in greater or lesser percentages, lead, zinc, iron, titaniferous iron, quartz and sulphur. Not of a very promising nature, however.

California Property Gives Promising Assays.

First Discovery by the Early Silver Prospectors.

Future Lies in its Copper Possibilities.

Prominent Los Angeles business men have just taken over the famous Leviathan copper mine, located south of the wonderful Comstock in California. These men include Jack Tehen, a well-known oil operator; O. P. Simpson, of Boston; John L. Henry, copper expert and mining engineer, and Frank L. Sizer, of San Francisco, as consulting engineer.

The Leviathan mine, located just to the south of the Comstock and a geological part of it, was discovered in 1853, by some poor mine workers who were seeking silver, and after opening several ledges of copper ore by driving a tunnel into the mountain, considered the deposits of copper ore to be of such small value that they abandoned the mine.

About 1865 the Leviathan came under the ownership of an English syndicate, who employed the famous English engineer, W. T. Rickard, F.C.S., of London, to examine and report upon the property, with the result that it became a producer of high-grade copper ore that was shipped to the smelter at Dayton, Nev., the transportation being by mule-back. Notwithstanding the excessive costs of transportation, the profits were sufficient to more than pay for the development of the mine.

W. T. Rickard's report upon the Leviathan mine was so interesting that it was copied by the United States government, through the United States Commissioner of Mines and Mining Statistics, and was published in the Commissioner's Fifth Annual Report to the Forty-second Congress, in 1871, by Roswell W. Raymond, commissioner. Mr. Tehen, one of the men now interested in the reopening of the mine says that one of the most interesting facts in connection with the examination of the Leviathan mine in recent times by several first-class engineers, is the phenomenally high-grade ore encountered.

"In comparison with several valuable copper properties in our neighboring State of Arizona, where great excitement is created over encountering 15 per cent. copper ore, this California mine has no assay return under 10 per cent, and tonnage is now waiting shipment that averages 27 per cent, and five feet of a large ledge encountered as
